* Laravel (PHP) Projects

- Panda Tree
- Flow Pot

- Popcorn Shed
- Word Learner
- Marutinandan Machinery

ERP & CRM Solutions

We've designed and developed multiple ERP and CRM systems tailored to various industries, helping businesses streamline operations, improve customer relationships, and manage workflows efficiently.

Customer & Invoice Management System

A complete backend system for handling client records, quotations, invoice creation, automated reminders, and GST-compliant reporting — ideal for service-based SMEs.

• School Management System

An all-in-one platform covering student enrollment, class scheduling, fee collection, exam management, attendance tracking, and parent communication — with both admin and teacher dashboards.

• Transport Management for Parcel Services

Built for parcel and logistics businesses, this system tracks shipments, manages vendor-partner pickups/deliveries, customer orders, and route optimization with real-time updates.

Solar Company CRM

Tailored for solar installation firms — includes lead tracking, quotation generation, project timelines, customer follow-ups, document uploads, and payment milestones.

Dentist Hospitality Management System

An advanced system for dental clinics: manages patient records, appointment bookings, billing, staff schedules, and follow-up reminders with a patient-friendly interface.

• Taxi Services Platform (Admin, Vendor & Customer Panel)

In-progress (50% done): A full taxi booking ecosystem like Uber — includes ride bookings, driver/vendor panel, live tracking, fare calculation, and customer support tools.

Vendor-side mobile app includes GPS-based job tracking and updates.

Home Maintenance Booking Platform (Admin, Vendor & Customer Side)

Currently under development: End-to-end solution for home services like plumbing, cleaning, etc. Includes booking, service matching, real-time vendor assignment, and

in-app vendor-side live tracking system.

Real Estate CRM for Admin, Brokers & Customers

Ongoing project that manages property listings, client inquiries, broker assignments, tour scheduling, and feedback collection — built to enhance conversion rates and sales team coordination.

Why Choose Codegrin Technologies?

- Diverse Technical Expertise
- Web, mobile, eCommerce, blockchain, and marketing—all under one roof.
- Tailored Solutions
 Every project is crafted to align with client vision, not just requirements.
- End-to-End Delivery
 From UI/UX to production deployment and support, we handle it all.
- Proven Track Record
 A robust portfolio across international markets and industries.
